

Brake Hoses

Chevrolet S10 1982-93 **GMC S15 Sonoma** 1982-93
Chevrolet Blazer 1983-94 **GMC Jimmy** 1983-94

For 1991 there are two types of designs used to attach the brake hoses to the frame. Check your truck's current hoses before ordering to ensure you order the correct hoses.

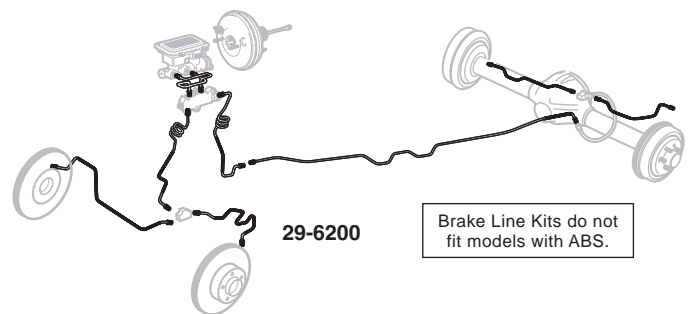

1st Design: Hose screws to frame.

2nd Design: Hose clips to frame.

Brake and Clutch Fluids Meet Your Safety Standards

Castrol Brake and Clutch Fluid exceeds DOT 3 and DOT 4 specifications and is recommended for all vehicles with these requirements. Unique formulation provides maximum protection against vapor lock failure. Available in a 12-ounce bottle.

Silicone Brake and Clutch Fluid meets DOT 5 requirements and is best for extended use; it won't absorb water that can cause corrosion. Silicone Brake Fluid will not harm painted surfaces. Available in a 32-ounce bottle. **Not compatible with DOT 3 or DOT 4 brake fluid. Not for use in vehicles equipped with ABS.**

Brake Master Cylinder and Power Brake Booster

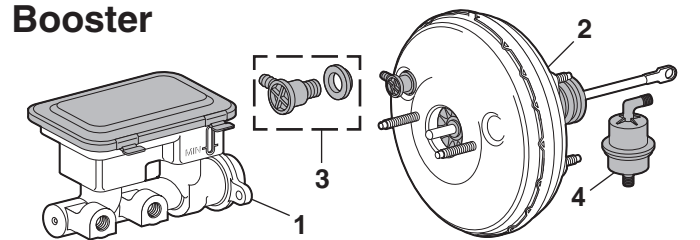

Chevrolet S10 1982-93 **GMC S15 Sonoma** 1982-93
Chevrolet Blazer 1983-94 **GMC Jimmy** 1983-94

How to Identify Your 1988-1993 Power Brake Booster:
 1988-93 models have a sticker affixed to the front of the booster housing. The sticker has two letters printed on it that are referred to as the stamped letters. Please order by matching the letters on your power brake booster with the correct part number.

Where to Find Production Option Label: The service parts identification label, located in the glove box, lists all production options for your vehicle. The options are represented by three character codes printed in alphabetical then numeric order.

Core Refund Information - Brake Booster: A rebuildable core will have no excessive wear. No broken, cracked or dented housings. No worn or stripped threads. If it does not meet the above standards, it is not rebuildable and will not be refunded. DO NOT send a non-rebuildable core.

Front Disc Brake Components

Chevrolet S10 1982-93 GMC S15 Sonoma 1982-93
 Chevrolet Blazer 1983-94 GMC Jimmy 1983-94

Caliper Sets include: Bushings, O-rings, Grommets and Bleeder Screws. Disc Brake Pads are sold separately.

ABS = Anti-lock Braking System

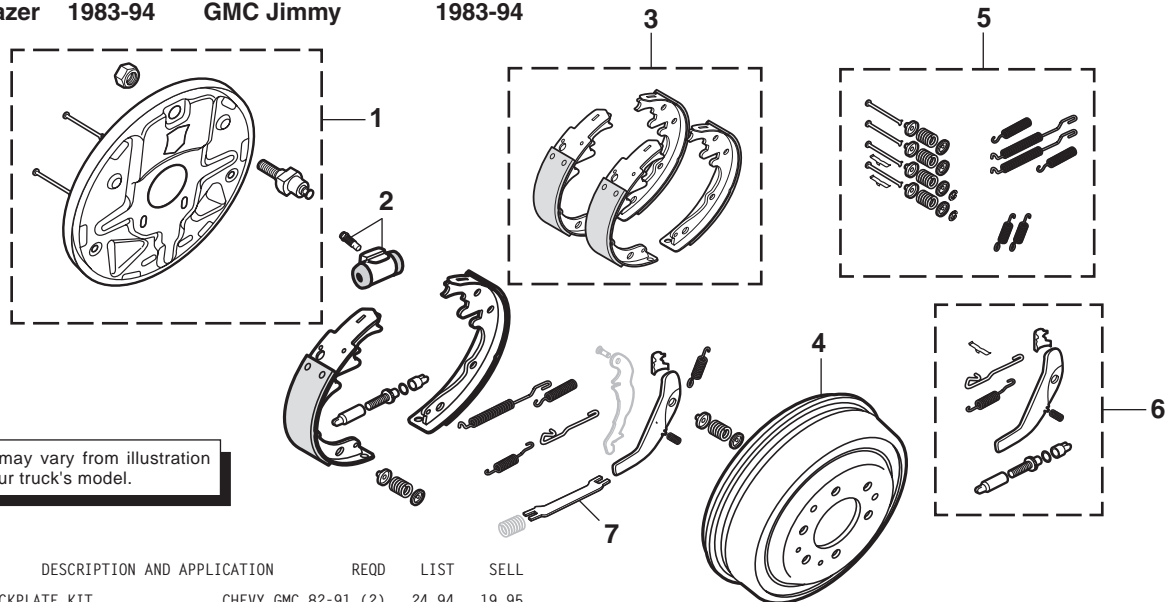

Core Refund Information - Calipers: A rebuildable core will have no excessive wear. Caliper must be assembled. No worn, damaged or cracked castings. No damaged bleeder screw threads or seat. No worn or elongated mounting points. If it does not meet the above standards, it is not rebuildable and will not be refunded. DO NOT send a non-rebuildable core.

Stainless Steel Brake Hose Kit

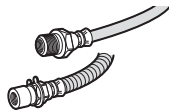

29-6290

Brake Hose Kits feature stainless steel braided hose with zinc-plated fittings, factory assembled for installation convenience. Stainless steel brake hoses increase braking performance and reduce brake pedal travel by eliminating hose expansion common to factory rubber hoses. Each kit comes with all necessary hardware and fittings.

For 1991 there are two types of designs used to attach the brake hoses to the frame. Check your truck's current hoses before ordering to ensure you order the correct hoses.

1st Design: Hose screws to frame.

2nd Design: Hose clips to frame.

Front Slotted Cross Drilled Rotors

29-6560

Increase the braking ability of your truck by installing Slotted Cross Drilled Rotors. Performance brake rotors provide shorter stopping distances, lessen fade and improve wet-weather braking. Chamfered cross drilled holes allow built-up heat and gasses to dissipate, lowering rotor temperature by up to 200°, prolonging rotor and pad life. The curved slots deglaze the brake pads, reduce brake fade and minimize brake dust. The rotors are CNC machined and feature a silver zinc coating to protect against corrosion.

Disc Brake Proportion Valve

Chevrolet S10 1989-93 GMC S15 Sonoma 1989-93
Chevrolet Blazer 1989-94 GMC Jimmy 1989-94

The Proportion Valve helps prevent premature rear wheel slide by limiting the amount of increase in hydraulic pressure passed to the rear brakes. This prevents the rear brakes from locking up before the full effective braking effort is produced by the front disc brakes.
