## Why You Should Buy from LMC TRUCK

Dear Dodge Ram Truck Owners:

As your eyes travel this catalog, you'll benefit from: What you need to know about taking care of your truck ... how to keep your truck looking good on the inside and out ... how to improve performance ... how to keep the body of your truck in trim shape ... how to make your engine sound great. But that's not all. Here are ten more reasons you should do business with LMC TRUCK based on the satisfied experiences of thousands of customers across the country and abroad.

LMC TRUCK is in no way affiliated with Chrysler LLC nor do we intend to imply that. The names Dodge and RAM are used for reference only.

Applications listed in this catalog are based on original factory information. However, variances will occur due to non-documented substitutions and changes made during the vehicles production.

- Confidence** ♦ You have the confidence you are dealing with an established company in business for over 25 years.
- Security** ♦ You are secure ordering online with the latest 128 bit encryption technology to keep your information safe using the industry standard Secure Sockets Layer "SSL". The SSL technology encrypts your credit card information to prevent it from being intercepted as it travels over the Internet.
- Trust** ♦ You can trust us. Through LMC TRUCK you can depend upon the reliability of our truck parts and accessories and the driveability they provide. They all add up to performance.
- Convenience** ♦ Direct online ordering is available 24 hours a day at [www.LMCTruck.com](http://www.LMCTruck.com) or by fax at 1-800-541-8525 without having anyone else in the middle. If you do not have an LMC TRUCK parts catalog yet, request one of our free catalogs today. You also have the confidence you can order parts and accessories from LMC TRUCK by mail or toll-free by telephone at 1-800-LMC-TRUCK, 7 days a week.
- Prices** ♦ You will certainly like our prices ... because they are very much in line. Whether it is original equipment, replacement or reproduction parts, LMC TRUCK prices are among the lowest in the business because of our volume purchasing. By dealing with Long Motor Corporation and LMC TRUCK through internet online ordering, mail order, fax or telephone order, you will have more dollars left over to put into your truck. Indeed, the way to have fun is to be affordable! In fact, you will find that the prices at LMC TRUCK are lower than the local truck parts store. Find the "Right Part ... Right Price ... Right Now"™. Shop LMC TRUCK.
- Protection Inventory** ♦ All orders at LMC TRUCK come with a full 180 days of purchase protection, return or exchange.  
♦ You will like our huge inventory of parts and accessories. We stock over 30,000 pickup truck parts and accessories so that you can get the part you need for your pickup truck FAST.
- Assurance** ♦ You have the assurance of working with Long Motor Corporation and LMC TRUCK, America's largest truck parts and accessories distributor. LMC TRUCK carries the most extensive inventory of truck parts and accessories in the world. Our Customer Service department will work with you to process your truck parts and accessories order in the most efficient manner possible! You will see that LMC TRUCK has been going beyond the call of duty to help ALL of our customers since 1981.
- Credit / Debit Ordering** ♦ We accept Visa ... MasterCard ... American Express and Discover.  
♦ Discover the ease, safety and convenience of ordering your truck parts and accessories online at [www.LMCTruck.com](http://www.LMCTruck.com). A direct order line is also available to you 7 days a week ... the toll free number in all 50 United States and Canada is 1-800-LMC-TRUCK. Truck parts and accessories orders can be placed with LMC TRUCK worldwide at 1-913-541-0684.

## How to Read this Catalog

Throughout this catalog, the application line of the part number describes which model of Dodge Truck that particular part will fit. The models this catalog covers are Dodge Ram 1500, 2500 and 3500. Because not everyone can identify their truck by these model descriptions, here is an example of what each word and number that appears on the description line stands for:

	APPLICATION	REQD
RAM	RAM	94-08 (1)
RAM SPORT	= Models with Ram Sport Package	
LARAMIE	= Models with Laramie Package	
1500	= 1/2 ton vehicle	
2500	= 3/4 ton vehicle	
3500	= 1 ton vehicle	
Part fits this year span _____		
Quantity required to complete one truck _____		

## Part Number Example

PART	DESCRIPTION AND APPLICATION	REQD	LIST	SELL
56-0640	LEAF SPRING BUSHING SET "A" RAM	94-02 (1)	74.94	59.95

The application line states that this part, **#56-0640**, fits 1500, 2500 and 3500 models from 1994-02. On the description line of part you see "A", this means there is a special note about this particular part. At the bottom of the page the part appears on you will find a shadow box that will describe to you what the special note for this part is. Example:

Note: "A" For leaf springs with main eye inside diameter measuring 1-3/4".

This note is telling you that this part, #56-0640, is for leaf springs with main eye inside diameter measuring 1-3/4".

SS	Stainless Steel
STD	Standard
STD CAB	Standard Cab
SYS	System
W/	With
W/O	Without

## 1994-08 Truck History

- 1994** Dodge introduced its first all-new full-size truck in 22 years. Dodge Ram pickup sales tripled versus 1993 model year, with 232,092 models sold. The 4x4 Ram was the first full-size pickup to have a four-link coil spring front suspension. The 8.0 liter V10 engine (available at mid-year) was the world's most powerful gasoline pickup engine rated at 300 horsepower and 450 ft.-lb. of torque. New chassis series designations 1500, 2500 and 3500 represented 1/2-, 3/4- and 1-ton pickups.
- 1995** The Club Cab Ram pickup was introduced. The standard cab Ram was the biggest in the industry, and the Club Cab allowed for even more room. The Club Cab was 20 inches longer than the regular cab to provide for the folding rear seat. Club Cab models offered six passenger seating and provided over 51 cubic feet of rear cargo space. Club Cab Ram pickups had more interior room than any of its competitors.
- 1996** The tailgate protector was cancelled. The 8.0 liter V10 engine was equipped with sequential multi-port fuel injection. Improvements to the diesel engine increased horsepower and torque. "RE" series automatic transmissions were electronically shifted to provide smoother shifting. OBD-II on-board diagnostics system debuted along with the ITEC powertrain control module.
- 1997** Ram Sport models were standard equipped with a 5.9L V8 engine, sport-tuned exhaust system with chrome tips, 17-inch wheels and a refined suspension system. For the 2500 series only the 8,800 lb. GVW rating was available. The so-called light 3/4 ton, 7,500 lb. GVW, was dropped. Remote keyless entry was available.
- 1998** The Dodge Ram Quad Cab was introduced. It provided two rear seat access doors. Club Cab and Quad Cab Ram pickups received new front seats with integrated seat belts to provide unobstructed rear seat access. Interior improvements included a contoured instrument panel and a redesigned console. Passenger side airbag with on/off switch was standard on all models. At mid-year a new 24-valve Cummins Turbo Diesel was introduced. Additional improvements were made to the electronic fuel injection system to provide more power and fuel efficiency. Power door lock and window switches were illuminated. Optional equipment available included heated power mirrors and security system.
- 1999** Ram Sport models were redesigned to feature a body color front bumper cover and grille, quad headlights, clear driving/fog lights and graphics. Steering wheel mounted radio controls were available. Overhead consoles were redesigned. Vacuum fluorescent odometer display debuted.
- 2000** The 1500 series Club Cab longbed and all 2500 and 3500 series Club Cab models were discontinued. The Off-Road Group option, offered only for the 1500 short wheelbase model, included a limited-slip differential, performance shocks and springs on the front and rear, a front stabilizer bar, skid plates, tow hooks, 4.10:1 gear ratio, 17 x 8-inch aluminum wheels with all-terrain tires.
- 2001** The Club Cab version was discontinued. Ram pickups continued with only minor updates or improvements. This was due in large part to the upcoming redesign of the Ram pickup for the next model year.
- 2002** This was a split year for the Ram pickup. The Ram 2500 and 3500 were a carryover of the existing body style. 2500 and 3500 models were only offered as a standard cab or quad cab. The Ram 1500 was totally redesigned and given a new body style. Two new engines accompanied the Ram 1500. The 3.7 liter V6 replaced the 3.9 liter V6 and the 4.7 liter V8 replaced the 5.2 liter V8. Ram 1500 Quad cab models featured full rear doors for easy access.
- 2003** The Ram 2500 and 3500 body style were updated to match the Ram 1500. Debut of the 5.7 liter Hemi V8 which produced 345 horsepower and 365 ft.-lb. of torque. The high output 5.9 liter diesel, only offered with a 6-speed manual transmission, produced an industry leading 555 ft.-lb. of torque.
- 2004** The Ram 1500 SRT-10 debuted as the fastest truck ever produced, capable of a top speed of over 150 mph. The SRT-10 used the Dodge Viper 8.3 liter V10 engine and 6-speed manual transmission. This package produced 500 horsepower and 525 ft.-lb. of torque.
- 2005** The Dodge Ram Power Wagon was available again. The Power Wagon was powered by the 345 horsepower 5.7 liter Hemi V-8. Standard features included 4.56 gear ratio, Bilstein shocks, electric locking front and rear differentials, 17 x 8 inch forged aluminum wheels, 33-inch all-terrain tires and a 12,000-lb. Winch.
- 2006** Ram models received redesigned headlights, grille, front bumper cover and fenders. Ram 1500 models had a rear tailgate spoiler for improved aerodynamics. New coil spring front suspension on 4WD Ram 1500 models. Multi Displacement System was available on Ram 1500 trucks equipped with the 5.7L Hemi V8. MDS seamlessly alternated between 4 cylinder mode for improved fuel economy and V8 mode when more power was needed. The available Mega Cab was the largest cab ever offered in a full-size truck. Mega Cab models were only available with a shortbed to allow for the additional 20 inches of cab space featuring reclining rear seats and seating for six adults.
- 2007** Headlights and tail lights were restyled for all Ram models. Ram 2500 and 3500 series trucks could be purchased with the new 6.7L Cummins diesel engine. The new diesel engine delivered 350 horsepower and 650 ft.-lbs of torque and was equipped with Bluetec emissions-reduction system that met the EPA's year 2010 emission standards. A new 6 speed automatic transmission was also available in diesel engine equipped trucks. The 4.7L V8 engine was E-85 fuel compatible.
- 2008** The 4.7L V8 engine was revised, featuring a new camshaft design and new cylinder heads with 2 spark plugs per cylinder. Power ratings for the 4.7L increased to 310 horsepower and 330 ft.-lb. of torque. Cloth seats were constructed of YES Essentials, an odor and stain resistant antistatic fabric material.
